

Create your own

Dream machine

Showcase your entrepreneurship and design skills by creating your own 'dream machine'. Invent a new machine which can help make life better or more convenient.

Find a problem worth solving

Think of simple products, machines, or devices in your life. Make a list of everyday inventions that make life more convenient or better than it was in the past. (Example: screw-top bottles, remote controls, portable battery for cell phone, etc.)

- _____
- _____
- _____

Think about your life at home, work, school, etc. What are some problems you would like to solve?

- At home _____
- At work _____
- At school _____

Turn your idea into a product

What is your invention? What would you name your invention?

What does your invention do?

How does your invention make life better or more convenient?

Who is this product for?

Draw a picture of your invention:
